

## No. 6540KS

### Clamp chain protection set

Completely pre-assembled.

| Order no. | Size | Max. clamping force to be secured | Weight |
|-----------|------|-----------------------------------|--------|
|           |      | [kN]                              | [g]    |
| 376111    | M12  | 15                                | 280    |
| 376129    | M16  | 40                                | 350    |
| 376491    | M20  | 75                                | 1313   |
| 376558    | M24  | 120                               | 1313   |

#### Application:

To use the clamp chain safely, the protection set is simply screwed below the hook end or the counterholder. Then, using the supplied connecting link, the protection set is fastened above the hook end or counterholder. This prevents the clamp chain from snapping uncontrolledly if the hook end or counterholder breaks.

#### Advantage:

- Easy mounting of the protection set
- Safe handling of the clamp chain
- Improved work safety.

#### Note:

If the protection set is damaged, the entire set must be replaced.
