

250-570 Watchmaker screwdriver set in wooden box (blade widths mm)

DESCRIPTION

The nickel-free watchmaker screwdriver sets in the wooden box of series 250 are used for precision work for the highest demands in craftsmanship and watchmaking. The screwdrivers with rotatable hexagon heads and knurled fine screw grips allow for the controlled transmission of strong torque. Made from corrosion-resistant aluminum, the handle ensures exceptionally high strength. Thanks to the rejuvenated handle shape, quick screwing is enabled. Depending on requirements, the set contains screwdrivers for various profile sizes and types. The information in the wooden box helps know exactly which screwdriver is needed.

APPLICATION AREA

For sensitive work for highest demands

BENEFIT

- Application-oriented assembly for universal use
- By storing it in the wooden box, the completeness of the set can be easily overviewed.
- Also suitable for other areas of technology
- High-quality material and hardened design
- Different designs allow for use with various profiles

OPERATION

- Hexagon hand support and turn the handle with fingers to operate screwdriver
