

49-A Screw extractor set, fine ribs, for Ø M3 - M18

DESCRIPTION

The 5-piece screw extractor set 49-A with finely grooved shape is used for extracting broken bolts and screws with right-hand threads. The screw extractors are an indispensable tool that neither hobbyists nor professional craftsmen can do without. The set includes screw extractors for thread diameters starting from M3 and depending on the version, up to a diameter of M18 (49-A), M24 (49-B), or M45 (49-C).

APPLICATION AREA

For unscrewing broken bolts and screws with right-hand thread

BENEFIT

- Application-oriented assembly for universal use
- Through the common storage, the completeness of the set can be well overviewed.
- Fine grooves ensure better traction and thus a comfortable work process.
- Optimized thread lengths ensure a shallow drilling depth.

OPERATION

- Center with a kernel screw<\/li>
- Drill a center hole in the screw<\/li>
- Screw the screw extractor counterclockwise into the drilled hole<\/li>
- Operate the square of the screw extractor with a wrench or spanner until the screw is removed<\/li><\/ul>
