

165-E Universal spreader with spread 10 mm - 75 mm

DESCRIPTION

The universal spreader of the series 165 is used for the quick and safe spreading of flanges and similar parts of all kinds and sizes in the industry. It is a universal tool designed for many applications, intended for paired use.

APPLICATION AREA

For fast and safe spreading of flanges and similar parts of all types and sizes

BENEFIT

- The smooth operation of the spreader is performed via a built-in ratchet.
- The tool allows for easy execution of maintenance tasks such as a seal ring replacement.
- After the work is completed, the flanges will be returned exactly to their original position.

OPERATION

- Place with the fork and spread the affected flange using the ratchet

MASTER DATA

GTIN [EAN]	4021176491979
