

17-B 4-piece separator set with quick-release pressure spindle Ø 22-115 mm/350 mm

DESCRIPTION

The 17-piece separator set 4 is used for removing ball bearings, roller bearings, inner rings, and other flat-lying parts in craftsmanship, industry, and workshops when there is not enough space for puller jaws. The separator-extraction process is able to gently separate those parts initially before they can be pulled off from the outside. Compared to series 15, series 17 is particularly handy because the separator jaws can be quickly and concentrically tightened by a pressure spindle. This 4-piece set includes one separator and puller device as well as a pair of extensions, ensuring the full range of applications.

APPLICATION AREA

For pulling off ball bearings, roller bearings, inner rings and other parts that lie flat on the surface

BENEFIT

- Application-oriented assembly for universal use
- By storing it in the box, the completeness of the set can be easily overviewed.
- A simple and safe handling is made possible by the quick clamping pressure spindle.
- The sharp edges allow for extraction where other types of extraction are not applicable.
- By screwing the separator and puller device together, the highest stability during pulling is ensured.
- If the separator jaws are screwed into the tensioning device in the opposite direction, the contact area is increased and removed in a gentler manner.

OPERATION

- Press the sharp edges of the separator behind the part
- Tighten the separating jaws by operating the pressure spindle and ensure that the separating blades are seated against the stop under the part to be removed
- Screw the pull pin of the puller into the threaded holes of the separator until it stops
- Hold the separator securely and carefully remove the relevant part by tightening the locking nut

MASTER DATA

GTIN [EAN]	4021176008696
Country of origin	DE
Case material	Tool steel
Series	K-17
Net weight [kg]	10,395 kg
Package contents	1 set
Packaging Act	PAP 21
Global sales capability given	Yes (REACH, RoHS, POP, PROP65, TSCA)

SPARE PARTS

- 017235_Side bolt with nut
- 018275_Side screw
- 17-2_Separator with quick-clamping spindle
- 17-2-06_Press spindle
- 17-2-T_Crossbar
- 18-2_extracting device
- 18-2-T_Crossbar

- 19-2-P_2 extensions for pullers
- 621170_Mechanical spindle
