

KS-70-A-K 60-piece bearing puller set

DETAIL IMAGE

DESCRIPTION

The 60-piece ball bearing puller set KS-70-A-K is used for non-destructive removal of deep groove ball bearings without disassembly of the shaft in craft, industry, and workshops. With these pullers, bearings that are simultaneously seated in a housing and on a shaft can be easily and quickly removed and may be reused if they are not already damaged. The series 70 impresses with its specially designed puller jaws for precise installation into the bearing raceways, which, depending on the selected set, enable secure removal of small to large bearings. The sets thus allow for a wide range of applications across various groove diameters.

APPLICATION AREA

For non-destructive removal of roller ball bearings without disassembling the shaft in craftsmanship, industry, and workshops.

BENEFIT

- Application-oriented assembly for universal use
- By storing it in the box, the completeness of the set can be easily overviewed.
- Quick and secure selection by labeling the storage adapters
- In the sentence, in addition to the pullers, there are also the corresponding puller sets and extractor rings, ensuring optimal application at all times.
- Self-damaged bearings can be grasped by the adjustable hooks.
- The claw shape provides a firm grip, allowing for high pulling forces to be developed.
- The puller is also suitable for removing sealed bearings from housing bores.
- The puller is rotatable by 360° on the crossbar ring.

OPERATION

- Select puller and hooks according to the supplied table
- Place the possibly fitting support ring on the inner ring of the bearing
- Insert hooks between the balls in the outer bearing ring
- Compress the hooks at the top, tighten the tension disc firmly, and remove the ball bearing by tightening the center spindle

MASTER DATA

GTIN [EAN]	4021176956362
Country of origin	DE
Case material	Tool steel
Series	KS-70-A-K
Net weight [kg]	9,875 kg
Package contents	1 piece
Packaging Act	PAP 21
Global sales capability given	Yes (REACH, RoHS, POP, PROP65, TSCA)
