

135-1 Separator fork with 18 mm jaw opening

APPLICATION IMAGE

DESCRIPTION

The fork separators of series 135 are used for loosening ball pivot joints that are wedged in the cone seat, for loosening steering levers, for disassembling shock absorbers, and for other separation work of all kinds in automotive and industry. Their universal applicability makes the fork separators an important companion for disassembly and separation tasks.

APPLICATION AREA

For loosening ball-and-socket joints wedged in the tapered seat, for loosening steering column levers, for dismantling shock absorbers and for all kinds of other separation work

BENEFIT

- The set includes sizes with various jaw openings for use in every case.
- Separator

OPERATION

- Place the separator on the part to be separated
- Leverage the part with targeted hammer strikes

MASTER DATA

GTIN [EAN]	4021176024856
Country of origin	DE
Case material	Tool steel
Series	135
Net weight [kg]	0,74 kg
Package contents	1 piece
Packaging Act	PAP 21
Global sales capability given	Yes (REACH, RoHS, POP, PROP65, TSCA)
