

40-3 Hub puller with crossbar, impact model, for bolt circles up to 225 mm diameter, 3 jaws

DESCRIPTION

The hub puller with the crossbar is used for pulling hubs from trucks. The spindle runs in a threaded bushing that is axially movable, in case impacts on the spindle head are necessary to loosen the hub. The freely movable T-handle on the spindle head ensures manual tightening of the spindle in tight spaces.

APPLICATION AREA

For pulling off wheel hubs on trucks

BENEFIT

- Preservation of wheel bolt threads by consistently flat-lying nut pockets
- Integrated, free-moving T-handle ensures manual spindle drive in tight spaces

OPERATION

- Attach the pulling jaws to the wheel hub using a screw connection
- Manually pull the spindle under pressure
- Activate the T-handle on the spindle head until the wheel hub is loosened

MASTER DATA

GTIN [EAN]	4021176014611
Country of origin	DE
Case material	Tool steel
Series	40
Net weight [kg]	4,51 kg
Package contents	1 piece
Packaging Act	PAP 21
Global sales capability given	Yes (REACH, RoHS, POP, PROP65, TSCA)
