Made in France

SKU: JLB260PACC | **Categories:** [Maintenance and repair](#), [Punch sets in mm](#) |

:

Set of 34 interchangeable and twinnable hollow punches with gasket cutting tool up to 420 mm

This set allows the cutting of gaskets, pellets, or washers up to 60 mm. The hollow punches are locked on the chuck very easily thanks to the spur system and can be twinned to cut a ring in one operation.

The handle is a high-performance, comfortable and safe striking tool. The reinforced impact head allows a longer tool life and its patented system which absorbs the vibrations is a real comfort for the user.

The tool has a double use and also allows the cut-out of larger diameters from 60 to 420 mm with a Ø420 gasket cutting tool. The ergonomic handle of the tool provides comfort and excellent dexterity as it frees one hand which can block the material to be cut. The stainless steel blade has been specially designed for precise, high-performance cutting.
