

STEEL TIE CRIMPER

BALL-LOCK TYPE

The tool is used to quickly and economically install stainless steel ball-lock cable ties. It automatically cuts ties up to 7.9 mm wide and 0.3 mm thick. It also enables adjusting the tension with a knob located on the bottom of the handle.

This tool is ideal for use in industrial installations, power industry and telecommunications. Allows the tie loop to be tightened and automatically cut off when the required tension is reached.

It is a fast and effective tool with a guarantee of five thousand full tie tightening operations, including cutting.
