Ear muff

- Climax 12 earmuffs have been especially designed for optimum protection of the user against continuous exposure to loud noise, reducing its harmful effects
- Ideal for full-time work in noisy environments
- Highly effective under harsh occupational conditions
- Size range: S, M and L.
- Band:- A foldable headband made of acetalic resin.
- The earmuffs can be adjusted by a two-point suspension system without projecting parts
- It is covered with soft padding so it can be adjusted closely to the head, Shells:- Made of UV stabilised ABS
- The shell filling is a sound absorbent material to increase acoustic attenuation of the earmuffs at certain frequencies
- The pad, which is secured around the shell, has polyester foam inside to improve the comfort and fit of the earmuff
- The adjustment cover that joins the pad to the shell has a shell-shaped piece that secured to the sound absorbent filling, minimises resonance of the shell
- Replacement parts:
- All ear muff pieces are replaceable and can be obtained

separately

Safety helmet

- The Climax 5-RS safety helmet has been designed and manufactured to ensure optimal impact protection from objects such as stones, bricks and other items of similar weight as well as from electrical discharges up to 1000Vac or 1500Vdc
- Helmet shell:
 - The helmet shell is manufactured of high-density injected polyethylene
 - The shell surface is smooth, with twin ribs along the length and a solid rib of triangular cross-section that provide greater rigidity to the helmet
 - The helmet also has a visor in the middle and a water rim around the remaining perimeter
 - The interior of the shell contains six housings to attach the harness
- Harness:
 - The harness is manufactured of injected linear polyethylene with high impact absorption capacity
 - The harness contains a head strap, neck strap and six buffering straps

- The head strap is covered in the front with a fabric sweat band
- The height can be adjusted with three different positions
- Ranging temperatures: -20 °C / + 50 °C
- Weight: 0,325 Kg
- CE Certification
- Norms: EN 397: 2012+A1:2012, EN 50365:2002

Safety helmet

- Ideal for full-time work in places susceptible to falling objects and electric shocks up to a voltage of 440 Vac, offering perfect and long-lasting protection
- The shell is made of high quality injected ABS with ultraviolet stabilisation
- This material offers excellent results regarding absorption and spread of energy produced by the impact of falling objects
- 30 mm universal slot
- It is manufactured by linear polyethylene injection with high impact absorption capacity. It consists of a head band covered on the front by a textile anti-sweat band, a neck band that can be adjusted by means of a flexible toothed wheel and textile straps
- The height of use can be adjusted in two positions
- The harness is anchored to the headgear at six points
- Working temperature: -10°C / + 50°C
- Weight: 0,355 kg

Welding goggles

The Climax 571-V spectacle have been designed and manufactured to guard against radiation emitted during oxyacetylene welding and flame cutting processes, providing effective, long-lasting protection with excellent performance and minimal hindrances so the wearer can work normally and without discomfort. Due to the design and materials, these goggles fit virtually any user. The front is a single piece composed of bridge, two lens holder rings with bevelled V-shaped groove, curved heel and stationary nose pads protruding from the lens holders. The entire front is manufactured of acetate. Each side contains a metal hinge used to join the front and the earpiece.

The pantoscopic lenses measure 59 x 51 mm and have a bevelled V-shape. They have no corrective or filtering effect. The lenses contain a UV stabiliser, have a nominal thickness of 2.5 mm and are manufactured of clear polycarbonate of

the highest optical grade.
Degree of protection: 5

Welding goggles

Climax 545-A goggle have been designed and manufactured to block the radiation emitted during oxyacetylene welding and oxygen cutting processes.

Frame and fastening system:

The frame is made up of a front and a fastening system. The front is green and made by injecting PVC resin. It has a slot all the way around the inner perimeter, which the collapsible frame slots into.

The collapsible frame is black and made by polyamide injection and consists of two parts, one part is fixed to the

front and contains the colourless eyepieces and another collapsible part that shelter the two filtering eyepieces.
Lenses:

The goggle have 4 lenses, 2 of which are colourless. They are circular, 50 mm in diameter and 3mm thick. The two filtering eyepieces are made of non-actinic glass and are 50 mm in diameter and 2,6mm thick.

They are situated in the collapsible part of the frame so they can be raised once the welding work is over, enabling perfect vision through the colourless eyepieces.

Wide range of shades: 4-6

Optical class: 1

Weighth: 0,190 kg.

Welding goggles

Climax model 80 goggles are designed and manufactured to protect against rays released during oxyacetylene and oxycutting operations. They provide long-lasting and effective protection. With excellent performance and minimal disruption for users to carry out their work without discomfort and in a completely normal way. The materials used and the design of the glasses make it possible to adapt the glasses to each user. The frame is made of two anodized aluminum housings, connected by a laminated black PVC bridge. In the area in contact with the face, the edge of the bowl is protected with a pad of natural rubber. The enclosures have twelve indirect vents on the sides.

Equipped with 2 round filter lenses

Made from in-actinic glass with a diameter of 50 mm and 2.6 mm thick

Welding face shield

The Climax head-type welding shield model 405-CPA is designed to provide effective protection against radiation emitted during welding processes, as well as any incandescent particles that may be released during such processes. The frame is made out of polypropylene. The screen covers the user's face and neck, protecting him/her from any potential burns. The fastening system is made up of a harness with two straps, one for the girth and the other crossing the first. The perimeter of the girth strap can be comfortably adjusted using the wing nut located at the rear. The length of the crossing strap can also be adjusted to seven different positions. The girth strap is padded to prevent discomfort in the places where it comes into contact with the user's head. The Shield's frame is fitted with a rectangular cavity to house the filter eyepiece, which is made of non-actinic glass and measures 110x90 mm or 110x55 mm and is EC certified. The eyepiece is fastened by means of an inner rectangular frame, which is attached to the main frame using screws. In addition, the screen has an external 1 mm thick filter cover made of colourless polycarbonate, which protects the non-actinic filter from particles and impact. The standard

screen is manufactured with a tone 12 nonactinic filter, although a wide range of tones are available
 Shades available 9 - 13, Harness size 56 - 64 cm
 CE Certification, Regulation (EU) 2016/425

Half mask

- The 762-S half mask has been designed to provide maximum protection against gases, vapours, and particles such as dust, mist and smoke
 - The half mask is compatible with filters Climax mod. 757.
 Main body of the half mask:
 - Made of natural blue silicone
 - The design and the material used allow it to adjust to the face in an airtight manner, preventing air from leaking into the interior through the face/mask join
 - The filter connector and exhalation valves are housed in the body
 Exhaling valves:
 - The half mask is fitted with two exhaling valves made up of a valve-holder and a membrane, which makes it easier for exhaled air to escape
 Fastening harness:
 - It has a comfortable neck strap and head strap that can be easily adjusted to the right length
 - It incorporates a rear clip for a better fit.
 Filters:
 - The filter is secured to the half mask with a bayonet system. Weight: 0,130 gr. CE Certification Norm: EN 140:1998
 Control body number: 0082

Full face respirator

- Model 741 is a general purpose full face mask (CL2) designed to provide the user with a high level of protection and comfort
- The filter connection is standard EN 148-1 (Rd40) and is compatible with the entire range of Climax model 725 filters (gas, particulate and combined)
- Ideal for use in polluted atmospheres with an oxygen content in the air of more than 19.5% by volume
- Body injected in one piece
- Made of thermoplastic elastomer with FDA certificate
- Features five attachment points for adjusting the harness
- Panoramic polycarbonate visor with a wide field of vision
- It is over-injected together with the face seal to avoid the loss of hermetic seal between the two parts
- The optical class of the visor is 1 and it has been surface treated to resist scratches
- It also offers protection against high velocity, medium energy (B) particle impact according to EN 166
- The filter connection to the mask is standard EN 148-1 (Rd.40) and is compatible with the full range of Climax 725 filters (gas, particulate and combined)

3
CLASE
CLASS

- The inner mask is made of thermoplastic elastomer
- Its design ensures that the inhaled air circulates inside the mask avoiding fogging and the exhaled air is evacuated directly
- It incorporates two inhalation valves
- The harness is attached to the mask body by means of 5 anchorage points
- The transport belt facilitates mobility when the use of the equipment is not required

Chipping Goggle closed 539-C

- Designed to offer effective protection against the impact of high speed and low energy particles, against liquid drops or splashes, coarse dust particles, gas and fine dust particles.
- The frame is manufactured in injected flexible PVC
- Antifog acetate lense.
- It can be used while wearing corrective glasses.
- Optical class 1
- To use in potentially explosive atmospheres. (ATEX)
- Versions:
539 – ventilated, 539-C – closed , EN 166:2001
EN 1149-1 · EN 1149-5

Full face respirator

- Ideal for working in polluted environments with an oxygen content in the air of more than 19,5%
- The mask is compatible with gas, dust and combined filters with a standard connection thread that complies with regulation EN 148/1
- Body: - The body of the mask is made of injected silicone rubber - There are five anchorage points to attach the clamp
- Inner Mask:
 - Made of thermoplastic rubber and fitted with two inhalation valves
 - Connector:
 - The mask has a filter connector with a thread that complies with the EN 148-1 regulation
 - Visor:
 - Transparent panoramic visor made of polycarbonate with an organic covering to protect it from scratching
 - Wide field of view
 - Protection against high speed particles (120m/s)
 - Clamp:
 - Made of natural rubber with ve anchorage points
- Carry strap: - Neck band made of re resistant PVC to hold the mask when it is not in use
- Weight: - 0,580 kg

Safety goggle 595 EN 166

Climax 595-I spectacle have been designed to offer effective protection against the impact of high-speed and low energy particles and against UV radiation.

Thus, these spectacles can resist the impact of small projected objects such as wood, metal and plastic shavings, pieces of stalks and branches projected when using gardening machinery, etc.

The speed of the particles must be less than 45 m/s. Their special design limits lateral vision as little as possible and thanks to their neutral optics and extreme lightness, they can be used for long periods without causing discomfort.

The front, made in one piece, has a black arch-shaped polyamidestrip.

The sidepieces are of the extendable spatula type.

It is panoramic, neutral and made of colourless polycarbonate,

measuring nominally 1.6 to 2.8. The nose supports are fixed, made as an extension of the eyepiece itself.

2C Protection against UV

1.2 Protection degree

1 Optical class

F T Protection from risk of impact by low-energy, high-velocity particles at extreme temperatures

Safety goggle 569 EN 166

Climax 569 goggles have been designed to offer effective protection against the impact of high-speed and low energy particles. Thus, these goggles can resist the impact of small projected objects such as wood, metal and plastic shavings, pieces of stalks and branches projected

when using gardening machinery, etc. The speed of the particles must be less than 45 m/s. It also offers users an excellent protection against UV radiation. Their special design limits lateral vision as little as possible and thanks to their neutral optics and extreme lightness, they can be used for long periods without causing discomfort.

Front: It has a blue arch-shaped polyamide strip, one piece.

Side protection: supplied by the extension of the sides of the eyepiece

It is panoramic, neutral and made of clear polycarbonate, measuring nominally 1.6 to 2.8. The nose supports are xed, made as an extension of the eyepiece itself, which also has two side wedges and a central orice to secure it to the frame.

2C Sun galre protection

1.2 Protection degree (allows between 74,4%)

1 Optical class

F Protection from risk of impact by low-energy,

CE Certification

Norms: EN 166:2001 EN 170:2002

Safety goggle 580 EN 166

The Climax 580 full spectacle has been designed to provide effective protection against the risk of impact by low-energy, high-velocity particles and are capable of resisting small fying debris such as wood, metal and plastic chips, pieces of twigs and branches from gardening machinery, etc. The speed of the projectiles must be less than 45 m/s. Due to the special design of the goggles, any limitation on the angle of side vision is minimised. The optical neutrality allows extended use without discomfort for the wearer.

The front is clear and composed of a single piece

The nose pads are stationary, protruding inward from the lens. The earpieces contain side shields, also manufactured of clear polycarbonate.

The spectacle has a single panoramic lens manufactured of clear polycarbonate with no corrective or filtering effect. The lens has a nominal thickness of 2.5 mm and measures 142 mm x 57 mm.
